3. **Reading.** Ex.1 p.147-148

4 *Work in groups. Answer each question and then read the text.
Compare your answers with those in the text. Are they similar?*

1 *Is population growing in all parts of the world?*

The world population is growing. Every day 200.000 people are born on our planet. That's a lot of babies! In the future there will be many more people and they will need more food, water, houses and energy. Most children are born in poor countries. Many of them don't have enough food and don't go to school. In some countries in Europe there are not many children and families are becoming smaller. Do you know anybody who has many brothers and sisters?

2 Are people responsible for the climate change that is happening?

Something is happening to our climate. It is getting warmer. Our springs and summers are very hot and there isn't so much snow in winter. The Arctic ice is melting. Earth's climate has changed many times. There have been ice ages and warmer periods but now these changes are happening fast. Are we responsible for this? Most scientists (but not all) say yes. We need to stop the global warming.

4. Writing in vocabulary.
